

Upgrading firmware on the ICW-1000G WiFi Phone

See screenshots below for ICW-1000G

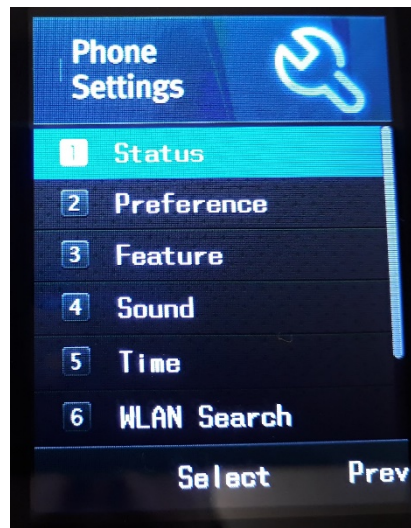

NOTE: To update the firmware, you will require the phone's IP address.

Getting started

1) Press the down key

2) Press OK

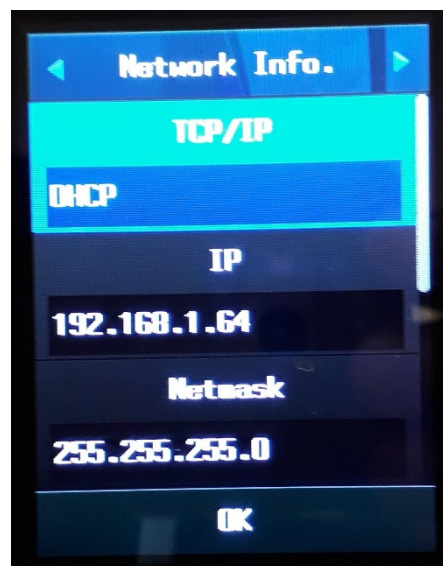

3) Press OK

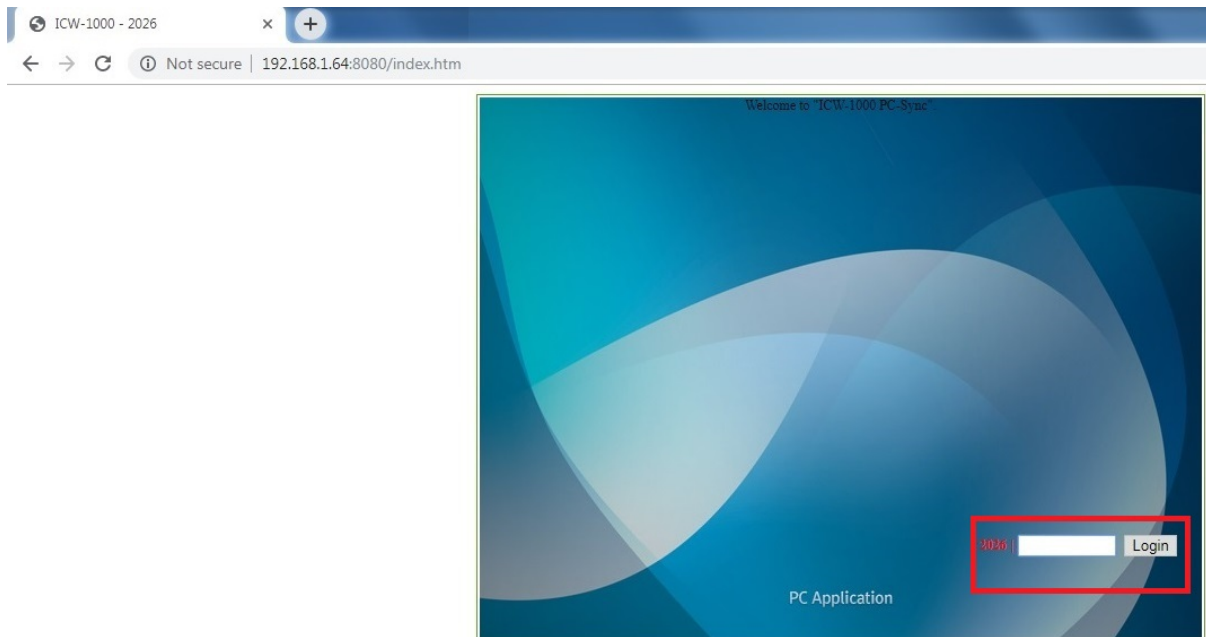

4) Press the left key

5) You will be using the IP address you found later

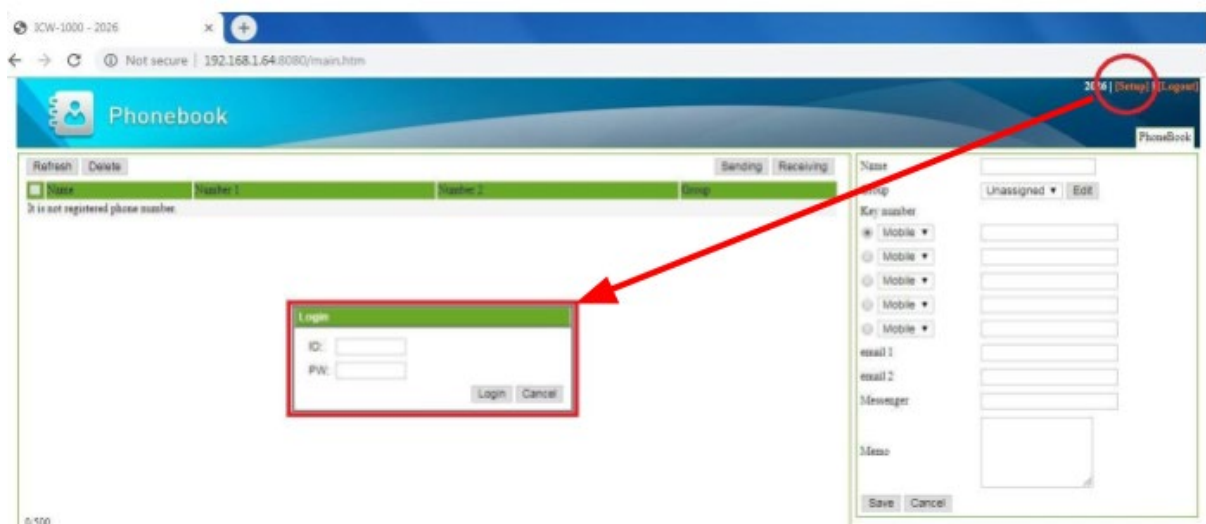

6) From a web browser on a PC located on the same network, type the IP address noted in step 6, and add **:8080** to the end (for example 192.168.1.64:8080 if the IP was 192.168.1.64)

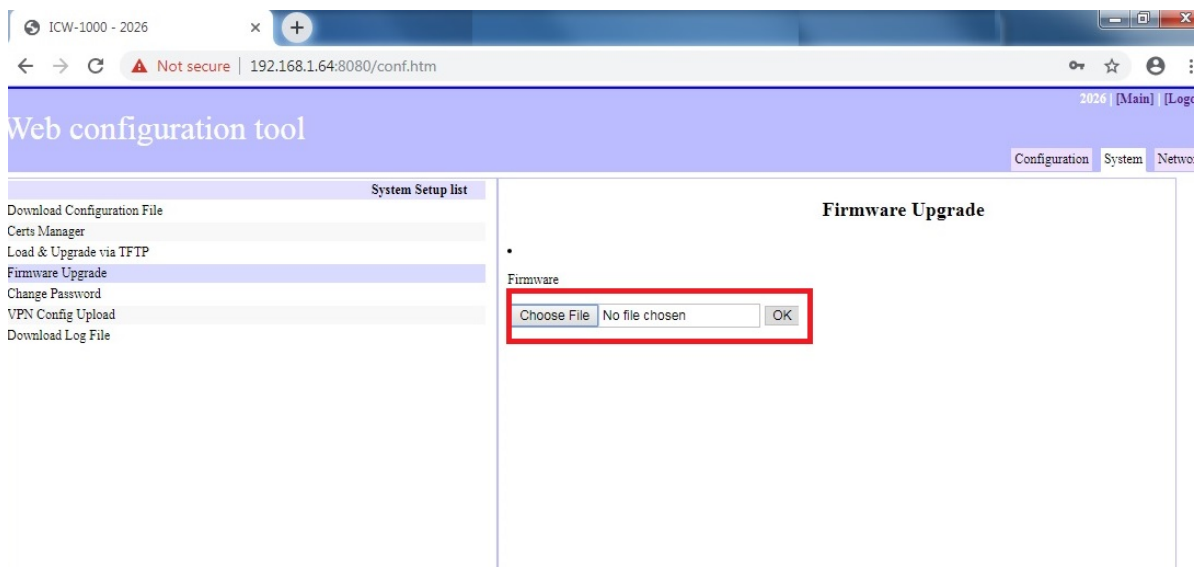

7) Enter the password ("000000" for example).

8) Login using the password
In the top right, select **[Setup]**
ID is **admin**
PW is **000000**

9) Navigate to **'System'** in the top right as seen above and select **'firmware upgrade'** from the left menu.

Please find the download link for the firmware below:
